Ted Bouskill
Senior Security Engineer
FIFA
Electronic Arts, CANADA

Ted is currently managing secure software development for the FIFA franchise with the EA Sports label within Electronic Arts. The FIFA franchise has sold over 100 million copies world-wide and is elite company with the most successful video games of all time. The worldwide success of the product has made it a target for cheating, fraud, piracy and many other security related concerns. Ted has been using computers online since the late 70's participating in BBS (Bulletin Board System) platforms setup and run by hobbyists in their homes and businesses. He's witnessed and participated in the growth of online systems such as CompuServe, AOL and now the world wide web as the technology grew and usage has transitioned from hobbyists to the mainstream public. Ted has seen it used for both good and evil and therefore has a comprehensive understanding of cyberspace.
